## Experience

### Infosys :

- **Senior Software Engineer** - June 2022 - Currently

I worked as a system engineer for the Heineken DOT (Digital Order Transfer) project, contributing to the development and enhancement of the company's B2B e-commerce platform for multiple countries. Created new features, APIs and integrations with external services.

Main technologies used: .NET core, Angular, and SQL Server.

### ACP Group (SEFAZ-SSA):

- **System Analyst** - April 2022- June 2022.
- **Junior System Analyst** - April, 2021 - March, 2022.

Development of new functionalities, for tax collection, services invoices emission and management systems, integration microservices and APIs for SEFAZ Salvador (Secretariat of Finance)

Technologies used: .Net(C#, Visual Basic, ASP), web forms, and Oracle.

### Grupo Recursos:

- **Junior System Analyst** - January, 2021 - April, 2021.

Worked on the maintenance and development of TRANSALVADOR ( traffic department of Salvador) management systems. Technologies used: .Net (C #), Razor, Crystal Reports and SQL Server.

### Rede Bahia:

- **Software Development Internship** - August, 2019 - December, 2020.

During my internship at "Rede Bahia", the state affiliate of Brazil's main open channel network, "Rede Globo", I played a role in improving and maintaining the company's ERP system. This opportunity provided me with valuable knowledge and hands-on experience with .Net (C#), ExtJS, Crystal Reports, SQL Server, SCRUM, teamwork, and communication.

---

## Education

System analysis and development

**Bahia Federal Institute (IFBA).**

- **Scientific Initiation**

Working as a Fullstack developer on GSORT (Distributed systems, Optimization, Networks and Real-Time application research group). For the project **Bisnez** – Digital environment for entrepreneurship support

<https://neti.ifba.edu.br/about-bisnez.html>

Technologies used: Docker, Git, Flutter, NodeJS and MongoDB.

- **Volunteer** at the extension course “**Introduction to stock market and computational application**”.

Worked at the administration of the course, managing the infrastructure for the online classes, solving the students doubts and assisting the teacher with the classes content
